

## Infinite Connected Data Sources

**IoT** enables us to apply intelligent applications to infinite connected data sources in order to drive real-time actions. These data sources can be from production lines, transportation, utilities, and indeed everyday objects that, when combined with data science, cloud computing and security allow us to enhance the way we work like never before.

Enterprises across any line of business, can now use this capability to face and overcome some key challenges centered around how to :

### Increase Operational Efficiencies

- Greater control over operations
- Streamlined delivery processes
- Cost-effective, secure monitoring, control, and management

### Generate New Revenue Streams

- Reach more customers in new markets
- New revenue streams and business models

### Improve Customer Experience

- Accelerate decision-making
- Faster response time
- Increased customer satisfaction
- Unprecedented business insight through real-time analytics

## TRANSPORT & VEHICULAR

Telematics, Platooning  
Fleet Management Solutions

## INDUSTRIAL

Process monitoring & Control  
Goods Tracking  
Computer Vision

## HEALTHCARE

Real-time/Guaranteed QoS  
DIY connected healthcare  
Remote Patient Monitoring

## AGRICULTURAL

Environmental monitoring  
(water, air, natural disaster alerts)  
Livestock tracking

## SENSORS

Utility metering, Waste management  
Keg Trackers, Tags, Locators, Detectors

## SMART BUILDINGS

Security systems  
Smoke detectors  
Home Automation

## SMART CITIES

Smart bicycles, City lighting  
Parking monitoring, Air Quality,  
Safe Space, Leak Detection,  
Sustainability, Health and wellbeing

## CONSUMERS

Wearables  
Location tracker  
Medical monitoring

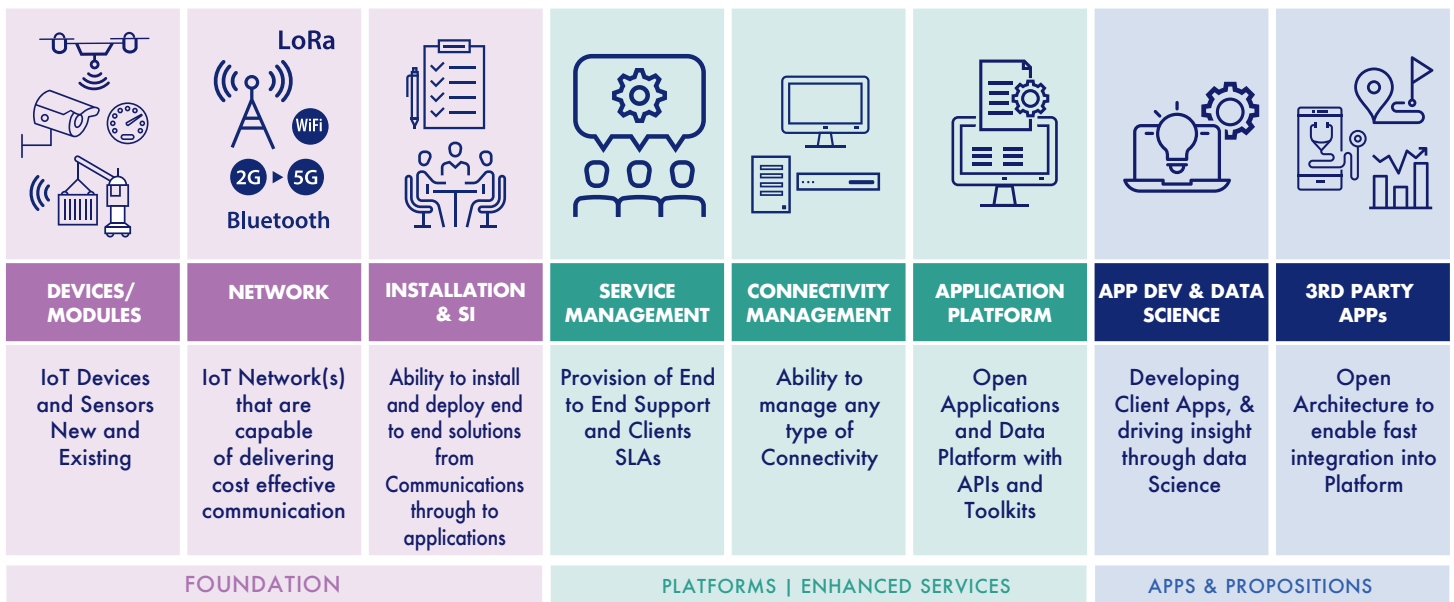

## IoT ecosystem with our partners

**KDDI**, together with our partners, enables an IoT ecosystem that brings together market ready solutions addressing all business sectors. We provide global IoT connectivity to some of the largest OEMs deploying solutions such as Connected Car and provide end to end IoT applications across Smart Manufacturing, Remote Collaboration, Computer Vision, Asset Management & Tracking, Condition Based Monitoring, Health Monitoring and much more, enabling decisions to be made in real-time and hence avoiding unexpected incidents. We do this by working with our clients to identify the areas causing the most concern and then bring together the right solution to meet their needs that ultimately helps them on their digital transformation journey.

## IoT Value Chain

### About KDDI

KDDI, a Fortune 500 and Top 10 Telecoms company worldwide, has a proven global track record of high-quality service delivery. KDDI is the leading connectivity provider for Connected Car solutions that contribute to the revolutionary advancement in car safety and infotainment underpinned by IoT. Our global business solution supports OEMs and other Enterprise customers in their digital transformation and driving real value across all operations.
